To
The Principal
KSRM College of Engineering
Kadapa, AP.

Sub: KSRMCE - (Department of CSE) – Permission to conduct certification course on .Net Technology -
Requested – reg.

---***---

Respected Sir,

With reference to the cited, the Department of CSE is planning to conduct certificate course on “.Net Technology” for B.Tech students from 04/03/2019 to 23/03/2019. So I request you to grant permission to conduct the certificate course. This is submitted for your kind perusal.

Thanking you sir,

*Forwarded to the
Principal sir,
J. Khizar*

Yours Faithfully,
J. Khizar
Coordinator,
S. Khaja Khizar
Assistant Professor,

Department of CSE
Certificate Course on
.Net Technology
Syllabus

Overview: The course is designed to provide complete knowledge on .net technology and to enhance the programming skills of the students by giving practical assignments to be done in labs.

Course Objectives: .Net is a framework that provides programming guidelines that can be used to develop a wide range of applications from web to mobile to windows-based application.

Course Outcomes: At the end of the course participants will be able to

1. Understand the basics of VB.NET&ASP.NET
2. Understand the concept of error and exception handling.
3. Understand the OOPS Concepts.

Module 1: Introduction to the .NET initiative and the .NET platform

Module 2: Code Management

Module 3: Object oriented programming concepts and Error and Exception handling

Module 4: Using controls and components for designing application.

Module 5: Design web application using ASP.net

Textbook:

- C# 6.0 and the .NET 4.6 Framework by Andrew Troelsen and Philip Japikse.
- Programming Entity Framework by Julia Lerman.
- Pro ASP.Net MVC 5 (Expert's Voice in ASP.Net) by Adam Freeman.
- Dependency Injection in .NET by Mark Seemann.
- C# in Depth by Jon Skeet.

Certificate Course on .Net Technology (04/03/2019 to 23/03/2019)
Schedule

S.No	Date	Time	Faculty	Topic
1	04/03/2019	4PM to 5PM	Sri. S. Khaja Khizar Mrs. V. Sudha Mrs. B. Swetha	Introduction about certification course
		5PM to 6PM	Mrs. B. Swetha	Module I: Introduction to the .net initiative and the .net platform: <ul style="list-style-type: none"> Detailed .NET Framework architecture, Name spaces
2	05/03/2019	4PM to 5PM	Mrs. B. Swetha	<ul style="list-style-type: none"> Assemblies, Exploring Assemblies and Namespaces Common Language Implementation , Metadata and Intermediate Language
		5PM to 6PM	Mrs. B. Swetha	<ul style="list-style-type: none"> Garbage Collection, Versioning and Side-by-Side Execution, The End to DLL Hell, Managed Execution, COM Inter Op.
3	06/03/2019	4PM to 5PM	Mrs. B. Swetha	Installation procedure for .net technology.
		5PM to 6PM	Mrs. B. Swetha	Module II: Code Management Data Types and Base Class Libraries - Understanding .NET Data Types - Stream and String Manipulation,
4	07/03/2019	4PM to 5PM	Mrs. B. Swetha	Files and I/O, Collections - The Microsoft. Visual Basic Namespace
		5PM to 6PM	Mrs. B. Swetha	Module III: Object Oriented Programming Concepts: Introduction to VB.NET and C#, Namespaces
5	08/03/2019	4PM to 5PM	Mrs. V. Sudha	Creating Classes, Classes and Inheritance
		5PM to 6PM	Mrs. V. Sudha	Overloading

6	09/03/2019	4PM to 5PM	Mrs. V. Sudha	Constructors and Destructors
		5PM to 6PM	Mrs. V. Sudha	Inheritance
7	11/03/2019	4PM to 5PM	Mrs. V. Sudha	Controlling scope and visibility, Dispose and Finalization, Modifiers, Properties and Indexers
		5PM to 6PM	Mrs. V. Sudha	Attributes, Reflection API
8	12/03/2019	4PM to 5PM	Mrs. V. Sudha	Module IV: Language Features Creating .NET Projects, Namespaces,
		5PM to 6PM	Mrs. V. Sudha	Threads
9	13/03/2019	4PM to 5PM	Mrs. V. Sudha	Debugging and Error Handling,
		5PM to 6PM	Mrs. V. Sudha	Structured Error Handling
10	14/03/2019	4PM to 5PM	Mrs. V. Sudha	Module V: User control: Creation of user control
		5PM to 6PM	Mrs. V. Sudha	Usage of user control
11	15/03/2019	4PM to 5PM	Mrs. B. Swetha	Customer Control: Creation of customer control
		5PM to 6PM	Mrs. B. Swetha	Usage of customer control
12	16/03/2019	4PM to 5PM	Mrs. B. Swetha	Gridview
		5PM to 6PM	Mrs. B. Swetha	Asp.net repeater control
13	18/03/2019	4PM to 5PM	Mrs. B. Swetha	File upload in asp.net
		5PM to 6PM	Mrs. B. Swetha	Asp.net security
14	19/03/2019	4PM to 5PM	Mrs. B. Swetha	Themes and master pages
		5PM to 6PM	Mrs. B. Swetha	App.config
15	20/03/2019	4PM to 5PM	Mrs. B. Swetha	Global.asax
		5PM to 6PM	Mrs. B. Swetha	Module VI: web application using asp.net
16	21/03/2019	4PM to 6PM	Mrs. B. Swetha	web application using asp.net
17	22/03/2019	4PM to 5PM	Mrs. B. Swetha	Practical's
		5PM to 6PM	Mrs. B. Swetha	Practical's
18	23/03/2019	4PM to 6PM	Sri. S. Khaja Khizar Mrs. V. Sudha Mrs. B. Swetha	Exam, Certificate Distribution and Vote of Thanks

Certification Course

On

.Net Technology

04/03/2019 to 23/03/2019

Target Group	:	B.Tech VI and VIII Semester Students
Details of Participants	:	53 Students
Coordinator	:	Mr. S. Khaja Khizar Asst. Prof, Dept. of CSE, KSRMCE
Organizing Department	:	Computer Science & Engineering
Venue	:	Web Technologies Lab (MB 210)

Description: Certification course on “.Net Technology” was organized by Dept. of CSE from 04/03/2019 to 23/03/2019. Mr. S. Khaja Khizar acted as Course Coordinator and Mrs. V.Sudha and Mrs. B. Swetha acted as Resource Persons. The course is designed to provide complete knowledge of .Net Technology and to enhance the programming skills of the students by giving practical assignments to be done in labs. Thirty Two hours course was successfully completed and participation certificates were provided to the participants.

Introduction to .NET

- **Content :**
 - Introduction to .NET Technology
 - Introduction to Web Based Applications
 - Introduction to ASP.NET

.NET Framework Objectives

- The .NET Framework is designed to fulfill the following objectives:
 - Provide object-oriented programming environment
 - Provide environment for developing various types of applications, such as Windows-based applications and Web-based applications
 - To ensure that code based on the .NET Framework can integrate with any other code

Common Language Specification

CLS performs the following functions:

- Establishes a framework that helps enable cross-language integration, type safety, and high performance code execution
- Provides an object-oriented model that supports the complete implementation of many programming languages
- Defines rules that languages must follow, which helps ensure that objects written in different languages can interact with each other

Introduction to .NET Technology

.NET Framework

.NET Framework Base Class Library

- The Class Library is a comprehensive, object-oriented collection of reusable types
- These class library can be used to develop applications that include:
 - Traditional command-line applications
 - Graphical user interface (GUI) applications
 - Applications based on the latest innovations provided by ASP.NET
 - Web Forms
 - XML Web services

What is .NET ?

Microsoft .NET is a Framework

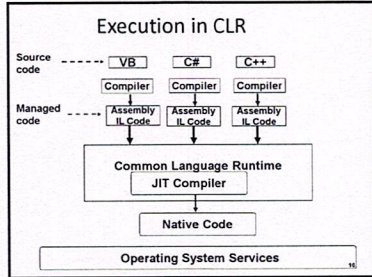

- Microsoft .NET is a Framework which provides a common platform to Execute or, Run the applications developed in various programming languages.
- Microsoft announced the .NET initiative in July 2000.
- The main intention was to bridge the gap in interoperability between services of various programming languages.

• The .NET Framework consists of:

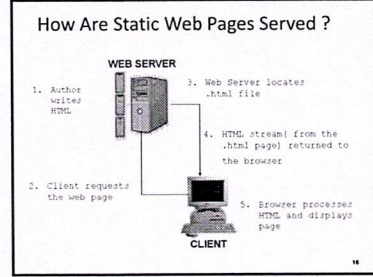

- **The Common Language Specification (CLS)**
It contains guidelines, that language should follow so that they can communicate with other .NET languages. It is also responsible for Type matching.
- **The Framework Base Class Libraries (BCL)**
A consistent, object-oriented library of prepackaged functionality and Applications.
- **The Common Language Runtime (CLR)**
A language-neutral development & execution environment that provides common runtime for application execution .

Common Language Runtime (CLR)

- CLR ensures:
 - A common runtime environment for all .NET languages
 - Uses *Common Type System (strict-type & code-verification)*
 - Memory allocation and garbage collection
 - Intermediate Language (IL) to native code compiler. Which Compiles MSIL code into native executable code
 - Security and interoperability of the code with other languages
- Over 36 languages supported today
 - C#, VB, Jscript, Visual C++ from Microsoft
 - Perl, Python, Smalltalk, Cobol, Haskell, Mercury, Eiffel, Oberon, Oz, Pascal, APL, CAML, Scheme, etc.

- ### C# Features
- Simple
 - Modern
 - Object-Oriented
 - Type-safe
 - Versionable
 - Compatible
 - Secure

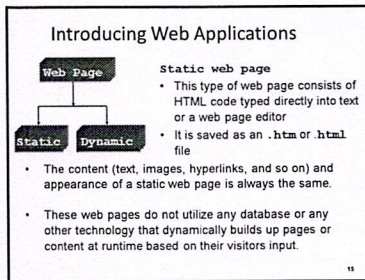

Visual Studio 2008 IDE

Microsoft has introduced Visual Studio.NET, which is a tool (also called Integrated Development Environment) for developing .NET applications by using programming languages such as VB, C#, VC++ and VJ#. etc.

Introduction to Web Based Applications

- ### Dynamic web page
- Dynamic Web sites provide its visitors to modify the content of the web page based on their input.
 - They utilize databases and other mechanisms that enable to
 - identify their visitors
 - present them with customized greeting messages
 - restructure the content according to user input etc..
 - Examples:
 - Online shopping stores,
 - search engines
 - email
 - chat, community portals etc.

- ### C# (C Sharp)
- Microsoft C# (pronounced C Sharp) developed by Microsoft Corporation, USA
 - New programming language that runs on the .NET Framework
 - C# is simple, modern, type safe, and object oriented
 - C# code is compiled as managed code
 - Combines the best features of Visual Basic, C++ and Java

- ### Dynamic web page
- Dynamic Web sites make use of "server-side technology"
 - Server-side technologies add an extra layer to the static web page that enables the Web Server to generate HTML on the fly.
 - The web server will first
 - interpret the server-side code present in web pages,
 - generate the appropriate HTML and then
 - send the response to the web browser.

How Are Dynamic Web Pages Served?

1. The Web browser sends a request
2. The Web Server searches for the requested page
3. Web Server collects the contents (code + HTML) of the web page and parses the contents to produce HTML.
4. The HTML stream is sent back to the requesting browser
5. Browser processes HTML and displays page

WEB SERVER

CLIENT

19

Introduction to ASP.NET

- It is built on .NET Common Language Runtime
- ASP.NET :
 - Provides better user authentication
 - Has better language support.
 - Has a large set of new controls (web controls)
 - Uses compiled code, which increases the performance of the applications
- It is programmable using any of the .NET languages (VB.NET, C#, VJ# etc).
- The ASP.NET pages are saved with the .aspx extension.

22

Advantages of ASP.NET

- Easy Programming Model
- Flexible Language Options
- Compiled Execution
- Rich Output Caching
- Web-Farm Session State
- Enhanced Reliability
- Master Pages
- Themes
- Improved Security
- Web Services
- Improved Performance and Scalability

23

Introduction to ASP.NET

21

Working of an ASP.NET Application

To execute an ASP.NET file, the following steps are followed:

1. A web browser sends a request for an ASP.NET file to the web server by using a URL.
2. The web server receives the request and retrieves the appropriate ASP.NET file from the disk or memory.
3. The web server forwards the file to the ASP.NET script engine for processing.

WEB SERVER

ASP.NET Script Engine

CLIENT

23

Visual Studio 2008 IDE

24

Introduction to ASP.NET

- ASP.NET is part of the Microsoft .NET framework
- ASP.NET is an effective and flexible technology for creating interactive and dynamic web pages.
- It is a convergence of two major Microsoft technologies:
 - Active Server Pages (ASP)
 - Active Server Pages is Microsoft's server side scripting technology for building dynamic web pages
 - .NET Framework
 - The .NET Framework is a suite of technologies designed by Microsoft where program development takes place.

21

Working of an ASP.NET Application

4. The ASP.NET script engine reads the file from top to bottom and executes it.
5. The processed ASP.NET file is generated as an HTML document and the ASP.NET script engine sends the HTML page to the Web server.
6. The Web server then sends the HTML code to the client which interprets the output and displays it.

ASP.NET Script Engine

CLIENT

24

Creating a New Web Application

- To start a new Web Application in VS 2008, Click the **Create Web Site** button on the Start page or Select **File > New > Web Site**
- The New Web Site allows you to choose:
 - Templates
 - Language for creating an application
 - Location where the application will be created

27

Creating a New Application (Continued)

- After you create a new Web Application, Default.aspx page is added to this Website. To Rename this page, Select the page from the Website node in the Solution Explorer > Right Click > Rename.
- Files can be added to the Project, using Solution Explorer:
 - Right click on the project node, in the Solution Explorer, and select the option **Add New Item**.
 - The **Add New Item** window will popup.
 - Select the type of file (item) to be added and click on **Add**.

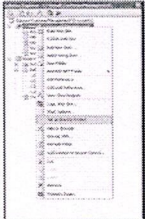

Toolbox

- To add controls in the Design Window use **Toolbox**.
- There are various **tool tabs** available in the Toolbox.
 - The controls in the IDE are presented in a hierarchical manner (e.g., Standard Tab, Data Tab, Validation, Navigation, WebParts etc.).
 - Depending on the type of project (application) the **toolbox tabs** will vary.
- To view the tool box:
 - Select menu **View > Toolbox**
 - OR
 - Press buttons **Ctrl+Alt+X** or **Ctrl+W, X**
- You can also view the controls as icons by right-clicking on the toolbox, you want to change and deselecting the List View.

Project Settings

- Project Settings** can be adjusted using various options in the **Project Properties** menu or by using the **Solution Explorer** window.
 - These settings change based on the type of application developed.
- Setting Startup Page:**
 - Right Click on the form you want set as the startup page in the **Solution Explorer**.
 - Select **Option Set As Start Page**.
- Startup Project** (In case of multiple projects):
 - Right Click on Project to set as startup project in the **Solution Explorer**.
 - Select **Option Set As Startup Project**.

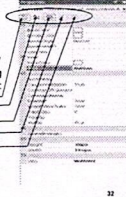

Solution Explorer

- Presents a **tree view structure** of files present in the project.
 - By default a New Website will contain:
 - An **App_Data** folder
 - A **Default.aspx** page (including **Default.aspx.cs**)
- To view Solution Explorer:
 - Select **View > Solution Explorer**
 - OR
 - Press buttons **Ctrl+W,S**

Properties Window

- To view or change the **properties and events** of a selected control during design use the **Properties Window**.
- To configure a control:
 - Click once to select it
 - Press **F4** or **Select menu View > Properties window**
 - Modify the appropriate properties in the window
- There are various options provided for viewing the properties of the selected control, such as:
 - Categorized view
 - Alphabetical view
 - Properties view (default)
 - Events View
 - Property pages

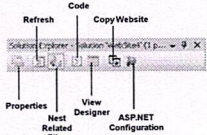

Resources

- Visual Studio 2008 Website
<http://msdn.microsoft.com/vstudio/>

Solution Explorer (Continued)

- The **Toolbar** at the top of Solution Explorer enables various tasks.

Adding an Event

- Events can be added to the code in one of three ways:
 - Double clicking a control in design view
 - Typing the code manually
 - Selecting the Events icon and double clicking the required event from the Properties Window

Questions and Comments
