Sub: KSRMCE - (Department of CSE) – Permission to conduct certification course on Android Application Development - Requested – reg.

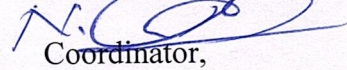

---\*\*\*---

Respected Sir,

With reference to the cited, the Department of CSE is planning to conduct certificate course on “**Android Application Development**” for B.Tech students from **06/05/2019 to 25/05/2019**. So I request you to grant permission to conduct the certificate course. This is submitted for your kind perusal.

Thanking you sir,

Yours Faithfully,

  
Coordinator,

Mr. N Ramanjaneya Reddy,  
Assistant Professor ,  
CSE Dept.,

KADAPA - 516003

**K.S.R.M. College of Engineering (Autonomous), Kadapa.**  
**Department of CSE**  
**Android Application Development**

**Module 1:**

**Java:** The Object-Oriented Programming concepts and their various models, A detailed study of Inheritance, How to handle the Exceptions in programming, Different types of Interfaces and Packages, What is the use of Java Virtual Machine and .jar file extension?, the types of Thread Class and Runnable Interface.

**SQL:** study the Data Manipulation Language and Data Definition Language queries.

**Module 2:**

**Android Introduction:** What is an Android App?, How to set up the development Environment, What is the .apk file extension and Dalvik Virtual Machine.

**Application Structure:** AndroidManifest.xml, Uses-SDK, R.java and Resources, Layouts and & Drawable Resources, Activities and Active Life Cycle.

**Emulator- Android Virtual Device:** How to edit emulator settings, How to Launch emulator, What are the shortcuts for Emulator, What is the use of Logcat, what is DDMS, Creation of First Project, The manifesting File, What is the Layout resource, Running your app on Emulator, Second App: (switching between activities, Develop an app for demonstrating the communication between Intents

**Module 3:**

**Basic UI Design:** Form widgets, Text Fields, Layouts, [dip, dp, sip, sp] versus px

**Preferences:** Preferences from XML

**Menu:** Option menu, Context menu, Sub menu, menu from XML, menu via code, Examples

**Module 4:**

**Intents:** Explicit Intents, Implicit intents

**Advanced User Interface Design:** Time and Date, Images and media, Composite, Alert Dialogs & Toast, Popup, Examples

**Styles & Themes:** styles.xml, drawable resources for shapes, gradients(selectors), style attribute in layout file, Applying themes via code and manifest file, Examples

**Content Providers:** SQLite Programming, SQLiteOpenHelper, SQLiteDatabase, Cursor, Reading and updating Contacts, Reading bookmarks.

### **Module 5:**

**Linkify:** Web URLs, Email addresses, text, map addresses, Phone numbers, MatchFilter & TransformFilter.

**Adapters and Widgets:** Adapters: a. ArrayAdapter, b. BaseAdapters, ListView and ListActivity, Custom listview, GridView using adapters, Gallery using adapters

### **Text Books:**

1. "Android Studio 3.0 Development Essentials", **Neil Smith**
2. "Android Programming: The Big Nerd Ranch Guide", **Bill Phillips & Chris Stewart**
3. "Android App Development for Dummies", **Michael Burton**
4. "Head First Android Development-A Brain-Friendly Guide", **Dawn Griffiths and David Griffiths**

## ACTIVITY REPORT

Certification Course

On

“Android Application Development”

06-05-2019 to 25-05-2019

Target Group	:	B.Tech V Semester Students
Details of Participants	:	58 Students
Coordinator	:	Mr. N. Ramanjaneya Reddy Asst. Prof, Dept. of CSE,KSRMCE
Organizing Department	:	Department of Computer Science & Engineering
Venue	:	MB209 (MAD Lab)

### **Description:**

Certification course on “Android Application Development” was organized by Dept. of CSE from **09-09-2019 to 27-09-2019** in MB 209(MAD LAB). Mr. N. Ramanjaneya Reddy acted as Course Coordinator & resource persons are Mrs. S. Riyaz Bhanu and Mr. N. Suresh Babu. This course will clear up the fundamental concepts of Android Application Development. Thirty Four hours course was successfully completed and participation certificates were provided to the participants.

Kadapa, Andhra Pradesh, India- 516 003

Approved by AICTE, New Delhi & Affiliated to JNTUA, Ananthapuramu.

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

## CERTIFICATE OF PARTICIPATION

This is to certify that Mr/Miss. Gr. Vineela  
bearing Roll Number. 169Y1A0531 participated in a  
certification course on "**Android Application Development**"  
organized by department of Computer Science and  
Engineering from 06-05-2019 to 25-05-2019.

## FEEDBACK FORM

Certificate Course on “Android Application Development”, from 06-05-2019 to 25-05-2019

Organized

by

Department of Computer Science & Engineering

NAME:

Roll No:

S.No	Feedback Item	Excellent	Very Good	Good	Average	Below Average
1	Organization of certificate course and session planning by resource person.					
2	Clarity in content delivery.					
3	Content is relevant and useful.					
4	Adequate opportunity to interact with resource person.					
5	Judicious mix of concepts, principles and practices.					
6	Assignments and tasks are interesting and challenging.					

Any suggestions for improvement.

## Android Programming

### Android

- Includes a Java API for developing applications
- It is **not** a device or product

### Manufacturers: Designing Android Devices

- Samsung
- Motorola
- Dell
- Sony Ericsson
- HTC
- LG
- Amazon
- Intel
- Texas Instruments
- ARM
- NVIDIA
- Qualcomm

### Overview

- What is Android?
- Why teach Android?
- What do you need in order to teach Android?
- Hello, Android

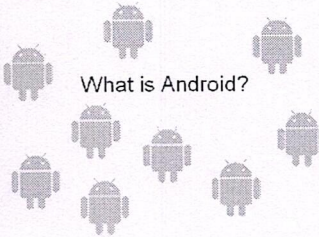

Links for android beginners: <https://www.udacity.com/courses/android>  
 Android Basics: (1) User Interface, (2) Multiscreen Apps, (3) User Input, (4) Data Storage, (5) Networking

### The Android Open Source Project (AOSP)

- An open source Linux-based operating system intended for mobile computing platforms
- An initiative led by Google
  - Makes the source code of the Android OS available for all
  - Read, review, and modify the code to your liking
- The main goals of the AOSP
  - Provide a set of compatibility guidelines—for OEMs (Original Equipment Manufacturers) and device manufacturers—for porting Android to custom devices
  - Build accessories that comply with Android's open accessory standard Allows OEMs and manufacturers to deliver a standard experience
- Making radical changes to that experience introduces fragmentation in the marketplace and in competing Android distributions.

## What is Android?

### The Open Handset Alliance

- Android, Inc. Created by Andy Rubin, Acquired by Google in 2005.
- Open Handset Alliance (OHA)
  - Formed in November 2007
  - Business alliance composed of mobile players
    - Chip makers
    - Handset manufacturers
    - Software developers
    - Service providers
- OHA began developing open standards based on Android, Inc. technologies. The result is the Android project.
- Google provided the initial code, online documentation, tools, forums, and SDK.

## Why teach Android?

### Engaging Students with Android

- Android has a lot of "buzz" now
  - Newness
  - Coolness
  - Googleness
- UI and graphics made simple(r)
- Advanced Java skills

### What do you need in order to teach Android?

### Online Resources

- [developer.android.com](http://developer.android.com)
- [code.google.com/p/apps-for-android/](http://code.google.com/p/apps-for-android/)
- [stackoverflow.com](http://stackoverflow.com)
- videos from Google I/O conferences

### What Skills Will Students Learn?

- Reinforce the basics: OOP, decomposition, etc.
- Separation of UI design and functionality
- XML and resource files
- Events and Listeners
- Callback methods
- Threads

### What Should Students Already Know?

- Java!
  - inheritance, method overriding
  - interfaces, casting
  - exceptions
  - debugging
  - reading API documentation
- Eclipse
  - easy to pick up quickly, though

### "Hello, Android"

### Android vs. iPhone

- Java vs. Objective-C
- Direct install vs. Marketplace vs. App Store
- Open source?

### Do I Need Phones?

- The emulator that is part of the Android toolset for Eclipse is quite good (though a bit slow)
- You may be able to get free "developer phones" from Google

### Creating Your First(?) Android App

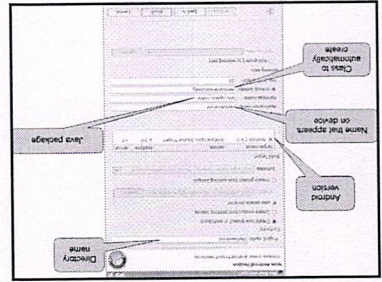

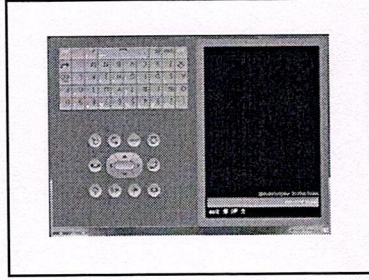

1. Set up your development environment
2. Create a new Android project in Eclipse
3. Run it in the emulator
4. Hilarity ensues

```

1 public class MainActivity extends AppCompatActivity {
2     // Called when the activity is first created.
3     @Override
4     public void onCreate(Bundle savedInstanceState) {
5         super.onCreate(savedInstanceState);
6         setContentView(R.layout.activity_main);
7         TextView textView = findViewById(R.id.textView);
8         textView.setText("Hello World, Hello Android");
9     }
10 }

```

strings.xml

```

1 package com.example.helloworld;
2
3 import androidx.appcompat.app.AppCompatActivity;
4 import android.os.Bundle;
5 import android.view.View;
6 import android.widget.Button;
7 import android.widget.TextView;
8
9 public class MainActivity extends AppCompatActivity {
10     // Called when the activity is first created.
11     @Override
12     public void onCreate(Bundle savedInstanceState) {
13         super.onCreate(savedInstanceState);
14         setContentView(R.layout.activity_main);
15         TextView textView = findViewById(R.id.textView);
16         textView.setText("Hello World, Hello Android");
17     }
18 }

```

main.xml

3. Run the Android Application

- Run → Run (or click the "Run" button)
- Select "Android Application"
- The emulator may take a few minutes to start, so be patient!
- You don't need to restart the emulator when you have a new version of your application

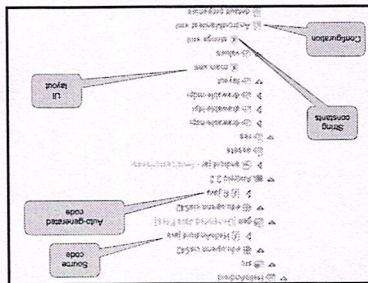

2. Create an Android Project
- File → New → Project
  - Select "Android Project"
  - Fill in Project details...

```

1 public class MainActivity extends AppCompatActivity {
2     // Called when the activity is first created.
3     @Override
4     public void onCreate(Bundle savedInstanceState) {
5         super.onCreate(savedInstanceState);
6         setContentView(R.layout.activity_main);
7     }
8 }

```

HelloAndroid.java

1. Set Up Your Android Environment
- <http://developer.android.com/sdk>
  - Install Android Studio with Android SDK (Android libraries)
  - Install JDK if it is not in your computer
  - Create AVD (Android virtual device)

AndroidManifest.xml

```
1 <?xml version="1.0" encoding="utf-8"?>
2 <manifest xmlns:android="http://schemas.android.com/apk/res/android"
3     package="com.example.myapplication"
4     android:versionCode="1"
5     android:versionName="1.0"
6     android:installLocation="auto">
7     <uses-permission android:name="android.permission.INTERNET" />
8     <uses-permission android:name="android.permission.ACCESS_NETWORK_STATE" />
9     <uses-permission android:name="android.permission.ACCESS_WIFI_STATE" />
10    <uses-permission android:name="android.permission.READ_EXTERNAL_STORAGE" />
11    <uses-permission android:name="android.permission.WRITE_EXTERNAL_STORAGE" />
12    <uses-permission android:name="android.permission.CAMERA" />
13    <uses-permission android:name="android.permission.RECORD_AUDIO" />
14    <uses-permission android:name="android.permission.VIBRATE" />
15    <uses-permission android:name="android.permission.ACCESS_BACKGROUND_LOCATION" />
16    <uses-permission android:name="android.permission.REQUEST_INSTALL_PACKAGES" />
17    <uses-permission android:name="android.permission.REQUEST_DELETE_PACKAGES" />
18    <uses-permission android:name="android.permission.REQUEST_DELETE_PACKAGES" />
19    </manifest>
```
