Activity Description:

Technology plays a great role in everyone's life, being an engineer it's necessary for us to learn and enhance our knowledge on various new technologies. KSRMCE provides great amenities for its students so that they can actively collaborate with the outside world. The mentors from APSSDC explained about the advantages of PLC dominated over the disadvantages of Microcontrollers in the terms of numbers of inputs and outputs, memory, networking etc. The Course started with the brief introduction of Industrial Automation. They told us how automation encompasses the whole system of industries by providing efficient technology to produce more products at a greater speed at the verge of low cost, and which encourages competition in the market and also the need for more efficient technologies. They also described various applications of automation and also of various types of components such as relays, switches etc. The last day of the course the students did some applications on PLC.
