### Activity Report

<b>Name of the Event</b>	Three day Workshop
<b>Name of the workshop</b>	Project Documentation using LaTeX
<b>Date(s) of the workshop</b>	28-3-2022 to 30-3-2022
<b>Target Audience</b>	B.Tech VIII Sem EEE Students
<b>Number of Students Participated</b>	28
<b>Resource Persons</b>	Ms. P. Priyanka, Ms .C. Manasa, & S. Yousuf (B.Tech VIII Semester)
<b>Organizer/Supporting Team</b>	N.Siddhik & A.Jyothirmayi
<b>Report</b>	LaTeX is most commonly used to create documents for academia, such as academic journals. LaTeX is a better choice because it features a reliable program for typesetting, footnotes, bibliographic, images, captions, tables, and cross-references. Microsoft Word also has some or less such similar features but LaTeX is doing this all in a flexible, intelligent, and aesthetically pleasing manner. LaTeX is, strictly speaking, a programming language and Turing-complete.
