Sub: Permission to Conduct Lecture – Reg.

Respected Sir,

We, the Staff of Computer Science and Engineering Department are planning to give a lecture on “**Need for Women Literacy to Remove Gender Disparities**” on **09th April, 2022** to create an awareness in the student community. In this regard we request your acceptance to conduct above said lecture.

Thanking You Sir.

*forwarded to the
principal sir,
N. Ramanjaneya Reddy*

Yours Sincerely,

N. Ramanjaneya Reddy
(Dr. N. Ramanjaneya Reddy)

*Permitted
V. S. S. Mm/4*

Activity Report

Name of the Activity	: Lecture on Need for Women Literacy to Remove Gender Disparities
Type of Activity	: Constitutional Obligations
Date and Time of Activity	: 09.04.2022 @ 04.00 pm
Details of Participants	: Faculty: 00 Students: 35
Coordinator / Resource Person	: Dr. N. Ramanjaneya Reddy, Assoc. Professor
Organizing Dept./Support System	: Department of Computer Science and Engineering

Description

Nowadays, the importance of women's education is growing day by day. It is not only important to educate girls and women, but also it is necessary to provide them with basic facilities. In many countries, especially in developing countries, the literacy rate of women is low as compared to men.

The main reason behind this illiteracy rate among women is the lack of proper resources. Women's Education in India, the situation of women's education is not very good. According to the 2011 census, the literacy rate of Indian women was 64.6%. This number is quite low as compared to the literacy rate of men, which is 80.9%.

There are many reasons behind this illiteracy rate among women. The most important reason is the lack of proper resources. In India, most of the women are illiterate because they are not allowed to go for education. Society thinks that men must educate their children, especially girls, because they think that women's role is only to take care of the house and family. If she starts going to school or university, then who will look after her house? Moreover, sometimes when women send their children to schools, they are not allowed to sit in the same class as their male counterparts.

This is because of the social customs and traditions which are still prevailing in our society. The Government of India has made it mandatory for all the schools to provide education to girls till middle school. However, this is not being implemented properly because of the lack of resources. The lack of resources is not the only reason behind the illiteracy rate of women. The mindset of people is also one of the main reasons. In our society, the role of women is still considered to be limited to the house and taking care of the family. This mindset is changing slowly, but it will take some time to change completely.

India is considered to be one of the fastest-growing economies in the world. Its democracy is also quite overwhelming for the entire world as the country comprises many cultures, religions, and diversities. Since independence from the Colonial Rule, India has done miracles in different phases and made significant development. This development is also due to women's education and empowerment steps taken by the Government.

The social stigma of gender bias and inequality is changing rapidly. India is becoming a superpower due to the similar contribution of both genders. By promoting education for women, India is also achieving a higher literacy rate very fast. This, on the other hand, will impressively help our country to progress in all aspects. The literacy rate of women was 8.6% after independence and has increased to 64% within 7 decades. Despite the glorifying facts, India is still wretched with different malpractices and social stigmas in the deeper corners.

Child labor, child marriage, dowry, etc., are a few of the prime reasons for gender inequality. Women were meant to be inside the house when men gathered food. This happened thousands of years ago when humans understood the biological differences

between the genders. The time has changed. We have a haven for all of us to live and prosper. Women should enjoy every right men are enjoying. One of the prime rights of women that is entitled to be is education. Education is the prime weapon to fight all such social stigmas and illogical practices.

This is the major step towards the brighter future of India. There are many reasons why women are still not given similar rights to enjoy and get educated. They are thought to be the burden of a family. Even today, female feticide is practiced. It means that this gender has less value in society. We need to educate the entire society regarding the social rights of all genders. Women should get educated to understand their rights as well.

If you look a little deeper, we will find that many crimes circle women, such as trafficking, rape, feticide, murder, dowry, etc. Gender-based discrimination is the prime reason behind such crimes. Until and unless both genders are considered to be equal, these crimes will carry on as usual. Women should be educated first. This is the stepping stone to such a beautiful future.

Even in the 21st century, many families feel reluctant to send their girls children to pursue schooling and higher studies. One of the prime reasons behind such malicious thought is economic disparity. Many families are unable to send their children to schools. When it comes to gender, they choose their sons and could not afford education for girl children.

There are many reforms and acts that the Government has amended to patronize women's education. Aids are distributed, and education is almost made free for children in rural areas so that women can get proper education to create a foundation. Their future is not restricted between the four walls of a house. Our society needs to believe that women are no less than men. They can pursue their dreams and compete with men in all phases.

We need to promote the benefits of women's education. Major changes are made in bills to encourage women's education. Strict actions are taken, and crimes related to gender should be penalized to stop gender discrimination. We should also teach our children that all genders are equal and should be treated accordingly. It is when women are educated, they will be empowered to make excellent decisions and will contribute to the economic growth of our country.
