Sir explained that a mock interview is an emulation of a job interview used for training purposes. The conversational exercise usually resembles a real interview as closely as possible, for the purpose of providing experience for a candidate. Mock interviews allow candidates to evaluate their current skill level and identify their weaknesses. Thus, mock interviews aim to provide aspiring candidates with a view to assess their condition which will determine how they perform in the actual interviews. Around 43 students participated in the program.</p>
